Patient Name	Patient Number	Booking Number	Birth Date	Date Of Service
DENNY D LOVERN	[REDACTED]	[REDACTED]	[REDACTED]	4/6/2017

more room. South metro then took over compressions and started them at 0200, started IV, checked blood sugar result of 53 and intubated patient. A round of Epi was administered by South metro at first rhythm check. Rhythm asystole. Compressions started, at second Rhythm check pt continued to have asystole heart rhythm. At 0211 all were in agreeance to stop compressions. South Metro called [REDACTED] from Parker Adventist Hospital to pronounce patient dead at 0215.

At approx. 20:20 this writer notified by DOT [REDACTED] that pt was feeling as though he may be having a "heart attack." Pt brought out to sallyport to see this writer. Pt ambulated on his own with his cane, chair was provided for pt to sit in. V/S obtained, HRR, lungs clear, pt c/o feeling a burning from his stomach up to his chest and that he threw up all of his HS meds. This writer provided pt Maalox which pt proceeded to throw up 2min later. Pt adamant that he did not want to be moved to medical however this writer explained that pt will be going to medical at this time for overnight observation. Pt also stating if he had been provided his protonix today that he wouldn't be having this issue, this writer explained that it was highly unlikely that one or 2 doses of protonix would "make everything better." Pt placed into a w/c and transported to MC 3 for overnight observation.
